Primary School**

**Curriculum  
Information**

**Summer 2018**

 <h2 style="text-align: center;">Who do I want to be?</h2> 							
Caring	Respectful	Curious	Honest	Informed	Active	Empathetic	Resilient

Global citizenship remains at the heart of our curriculum through our whole school theme - 'A Time to Talk; A Time Change' where we continue to learn about the **17 Global Goals**. Our aim is for our children to develop **learner competencies** set out in our new **values framework** as seen above. This focuses on exploring **who we are**; how **we learn independently**; how **we learn collectively** and encourages **everyone to be a changemaker**. Following the completion of the KS2 SATs tests, which the children have shown great amounts of determination and resilience in preparing for thus far, we will be embarking on our exciting Paris and London trips! A meeting for parents about the Paris trip is taking place on the 18<sup>th</sup> May. Our whole school project this term will mark 100 years since some women were given the right to vote in Britain. There will be events to engage the children in this important topic.

### Topic

In their final term at Torriano, the children will be completing a local area study into Kentish Town. Pupils will be using a range of primary and secondary sources to explore and study how Kentish Town has changed over the years.

Through this topic, children will actively explore elements of their local area whilst developing key geographical skills; including map reading.

### English

In preparation for the upcoming SATs tests, we will be concentrating on consolidating and learning spelling, punctuation and grammar skills. We will also be using the ever-helpful Torriano Detective Agency to explore and make textual inferences about a wide range of fiction and non-fiction texts.

We are looking forward to reading and exploring play scripts in the second half term for our end of year production, which will be confirmed later in the term!

### Maths

We will continue to learn a range of mathematical skills and concepts, with a focus on geometry and ratio and proportion this term. Throughout our learning, we will be taking the time to develop arithmetic fluency, practising the four operations with whole numbers, decimals and fractions regularly. Verbal and written mathematical reasoning, along with pictorial and written problem solving, will challenge year six to think reason creatively.

### Science

Children will be learning about electricity in the summer term, which will include using electrical paint to paint circuits!

In the latter half of the term, we will move on to our final topic: 'Animals including Humans'. Pupils will learn about the structure of the heart and other systems in the body, recognising how organs can be impacted by lifestyle.

## PE

In preparation for Sport's Day, later in the summer term, year 6 will have athletics on a Friday and will be working on control and extension in Gymnastics on a Monday. Swimming lessons will take place in the second half term.

## RE

Year 6 will learn more about the concepts of Power and Wisdom. They will explain what justice means to them and relate in to the teachings of Islam, Christianity and Judaism.

## Art

Art work this term will be linked to the coming of Spring! With the help and expertise of our resident artist, children will soon be designing and creating the set for our production.

## Music

This term Year 6 pupils will be learning about different themes in music. They will listen to music composed to create different effects and moods. Pupils will then compose and create music for their year 6 production!

## MFL

Year 6 will be continuing to prepare for the Paris trip. We will be investigating Paris and describing what we are going to do using a variety of tenses. Year 6 will have plenty of opportunities to put their French skills into practise in June.

## PSHCE

In preparation for our move to secondary school, we will be thinking about friendships and how our attitudes and behaviour influences those around us. Pupils will also have Relationship and sex education. A letter will go out later in the term with further information.

## Computing

Year 6 will be developing their ability to use technology safely as part of our on-going focus on e-safety, particularly in our reflected sessions. We will also use the medium of technology to learn about the validity of sources.
