Autumn 2018

Year 1

Who do I want to be?

As a **Rights Respecting School** we are continuing to learn about the rights and lives of children throughout the world and to explore the whole school Big Question, '**Who do I want to be?**'. Through our whole school theme, '**Our Future Starts HERE**', we continue to focus on **turning learning into action in our community** and beyond.

We learn about our local area throughout this term, we will explore our topic through trip to our local area. We will also be thinking about the High Street, visiting Kentish Town High Street and creating our own High Street Experience, making our own shop fronts and products using a range of materials.

Humanities

We will be exploring our local surroundings and creating maps to develop our locational knowledge. As part of our Local High Street study we will be thinking about where Kentish Town is in relation to the rest of the world.

We will be exploring the history of our local high street and finding out what changes have happened within living memory.

English

Children will be taught phonics daily. They will continue to learn and use the phonic sounds to become independent readers and writers.

English teaching will be text based. Some of our key texts for this term are 'Growing Good' and 'The High Street'.

Oracy will form the foundation of all English teaching, with speaking and listening skills being integral.

Maths

This term we will have a strong focus on learning our number bonds to ten and using them fluently to add and subtract.

The children will become familiar with a range of different equipment to support their mathematical enquiry, such as tens frames and numicon. Through games and practical activities children will become more confident with their number facts.

Science

Throughout the year we will learn about the seasons through observation; this term the children will be learning about autumn.

The children will also be learning about everyday materials; identifying and naming them, describing their physical properties, comparing and grouping them. The children will use what they have learnt and link it to our topic, thinking about what materials are best for building.

PE

We will be learning to master basic movements including running, jumping, throwing and catching as well as developing balance, agility and coordination. We will begin to apply these to a range of activities.

RE

This term the children will be sharing books that are special to them and learning about books that are special to different religions. They will also be learning about the Christmas story.

Art

The children will use a range of materials creatively to design pictures and objects linked to our topic. We will look at the work of Andy Goldsworthy and create our own art work using natural materials.

PSHE

The children will be working hard to understand the rights of the child, how Torriano is a Rights Respecting School and what this means. They will learn about our school values (caring, curious, respectful, active, informed, honest) and linking this to our big question 'Who Do I Want to Be?'. We will work together to create a class charter and think about how the charter can help us independently, as a class and as a community.

Computing

This term we will be going to the Camden Learning Centre where we will start to learn what algorithms are. We will also learn how to use technology safely and respectfully. We will also use BeeBots, linking with our geography learning.
